

TEAM WENDY®

EXFIL® BALLISTIC

TEAM WENDY'S EXFIL® BALLISTIC HELMET

The EXFIL® Ballistic features a hybrid composite shell with custom geometry that yields increased strength and an optimal fit. Retention is provided by an innovative, boltless Cam-Fit™ system that quickly adjusts and conforms to individual head shapes, providing a comfortable and stable fit. Impact protection is provided by a newly designed Zorbium® foam liner with customizable comfort pad set and a removable center channel for communications headband clearance.

The EXFIL® Ballistic also features our accessory rail 2.0 system with integrated T-slots for custom mounting, and compatibility with accessories such as our quick release picatinny adapter. An updated Wilcox® W Shroud is lanyard compatible and gives secure connection of any standard NVG mount. Available in black, coyote brown and foliage green.

Team Wendy - We Innovate to Protect.
